## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tashiro et al. [US 5,515,022] in view of Hirohashi [JP 06-112047] and Mizoguchi et al. [US 6,593,841].

Tashiro et al. in view of Hirohashi discloses the instant claimed invention [see final office action mailed 8/12/2003, paragraph 2] except for the insulation layers contact one another in area not in contact with the conductive pattern.

Mizoguchi et al. discloses a planar magnetic element [figures 5-6] comprising at least two insulation layers [20B, 20C] and a conductive layer [40] disposed between the insulation layers, wherein the insulation layers contact one another in area not in contact with the conductive pattern [figure 6].

It would have been obvious to one having ordinary skill in the art at the time the invention was made to use the insulation layer arrangement of Mizoguchi et al. in Tashiro et al., as modified, for the purpose of providing better insulation and reducing the thickness of the device.

### ***Response to Arguments***

Applicant's arguments with respect to claims 1-7 have been considered but are moot in view of the new ground(s) of rejection.
